Erasmus Day Celebration

"Competition: Creative sustainable packaging" – Regulation

Theme

» The theme for the competition is "Creative sustainable packaging ".

» The main goal of this competition is to raise awareness among students for the need to use sustainable packages. On day-to-day use, we should think about reducing the use of materials, reusing as much as possible and recycle. We need specially to dispose properly in order to allow recovery systems in-place to run as efficiently as possible and to avoid materials to end up lost in the environment. We also aim at promoting a section where students interact with professors and experts from the University, discussing and learning about the subject and at the same time having fun and enjoy a relaxing end of working week.

Elegibility

» Mobility Students at Universidade Católica Portuguesa – Porto

» International students at Universidade Católica Portuguesa - Porto

Format and Application

» A sustainable package where you bring your food to the pic-nic to be presented to the jury

» This presentation may also be made through a picture, power-point or any support alike sent to international@porto.ucp.pt until 6PM on the 11th of October

» The package can be prepared on an individual level or at a group level, as long as you refer the names of everyone involved.

Selection/Awards

» The winner will be selected by a panel of 3 judges;

» The packages will be assessed based on the following criteria: (1) sustainable character is explained and justified by the candidate, (2) it fulfils the function (bring the food to the pic-nic safely and adequately); and (3) originality;

» A photo of the packages will be posted on the University's social media accounts and website

» The winner of this contest will be awarded a prize.
